

LORDVINCE LIWAG

Virtual Assistant | AI Automation | AI-Powered Systems

Cabanatuan City, Nueva Ecija, Philippines | Lordvincedliwag1@gmail.com | 0977-621-3473

PROFESSIONAL SUMMARY

Practical Virtual Assistant focused on administrative support, Google Workspace, AI-assisted workflows, and business automation. Hands-on builder of web and AI-powered projects, including a VA automation platform built with multi-client support and an AI-assisted e-commerce project in development. Brings a problem-solving mindset, strong digital tool skills, and a focus on organized, reliable workflows.

CORE SKILLS

Virtual Assistance: Administrative support, online research, documentation, organization, digital business support

Google Workspace: Gmail, Calendar, Drive, Docs, Sheets, Workspace workflows

AI & Automation: ChatGPT, Claude, Gemini, prompt engineering, n8n, Zapier

Web & Systems: HTML, CSS, JavaScript, TypeScript, Node.js, Supabase, REST APIs

Tools & Deployment: GitHub, Render, Netlify, Canva, AI-assisted development tools

SELECTED PROJECTS

VA Automation Hub — *Deployed*

Built a practical VA automation platform centered on Google Workspace workflows, including Gmail, Calendar, Drive and Sheets integrations, AI-assisted work, multi-client separation, and human-in-the-loop approvals.

Technologies: Google Workspace APIs, Node.js/TypeScript, Supabase, OAuth, Render

Live Demo: <https://va-automation-hub.onrender.com>

Ratecraft — *Live Web Project*

Created a responsive lead-generation website focused on value-based pricing education for freelancers, with structured landing-page content, FAQ interaction, and email opt-in.

Technologies: HTML, CSS, JavaScript, Formspree, Netlify

Live Demo: <https://rate-craft.netlify.app/>

Kanso Living — AI Dropshipping / E-commerce — *In Development*

Developing an AI-assisted worldwide e-commerce concept focused on product discovery, storefront workflows, catalog operations, and automation.

Project Type: Independent project

VA Toolkit — *Personal Project | AI-Powered Utility*

Built an AI-powered drafting utility designed to support practical virtual-assistant work and content preparation.

TRAINING & PROFESSIONAL DEVELOPMENT

- RENE AI Virtual Assistant Training / Internship Program
- Digital Design Training (Certificate)
- Bookkeeping Training (Certificate)
- TEFL Training — 120 hours
- Self-taught via free YouTube-based courses in email management, calendar management, social media management, and AI

ADDITIONAL VALUE

Combines VA fundamentals with practical experience building digital systems. Comfortable learning new tools, following structured workflows, documenting processes, and improving repetitive business tasks through AI and automation.
